

## Organisation

W2 Global Data

## Industry

FinTech and Financial Services

## Background

Following the introduction of GDPR and working towards ISO 27001, W2 Global Data provides services that facilitate compliance in electronic transactions, including Know Your Customer (KYC), Anti-Money Laundering and other fraud prevention services.

## The Problem

W2 Global were seeking a comprehensive and user-friendly platform to educate staff of all aspects of information security and data protection conscious practices.

## The Solution

Hut Six's interactive and engaging cybersecurity awareness training, phishing simulator and learning management system.

“Since using Hut Six training everyone’s awareness has increased which was shown during our ISO 27001:2013 certification audits.”

W2 Global Data provides a wide range of Platform as a Service (PaaS) based tools to help organisations conduct financial checks that facilitate financial transactions. This includes the provision of Know Your Customer (KYC) data and ID verification tools, which necessitates a security aware culture.

W2 boast access to the world’s most robust data providers that ensure clients receive the very best and most effective information for transactional processes. As such, employees require a comprehensive and practical understanding of information secure behaviour.

Hut Six’s interactive training provides a means of engaging employees with useful and effective tutorials. Accompanied with Hut Six’s learning management software and phishing-attack simulator, W2 Global Data are tracking, measuring and improving upon the awareness and behaviours of their staff in a tailored, effective and easy to implement way.

“We would recommend the Hut Six product to anyone looking to increase their company’s knowledge of Information Security and GDPR”

- Alex Loane, Information Security Manager, W2 Global Data
